MEMORANDUM FOR PRS (Contractor/In-House Publication)

FROM: PROI (TI) (STINFO)

16 June 1999

SUBJECT: Authorization for Release of Technical Information, Control Number: AFRL-PR-ED-TP-FY99-0133 C.T. Liu, "Microstructure Induced Inhomogeneous Strain in a Particulate Composite"

1999 ASME Summer Conference

(Public Release)

Microstructure Induced Inhomogeneous Strain in a Particulate Composite

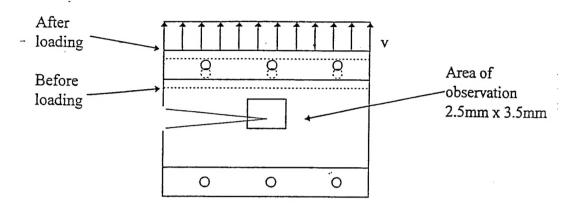

C. T. Liu And J. Gonzales

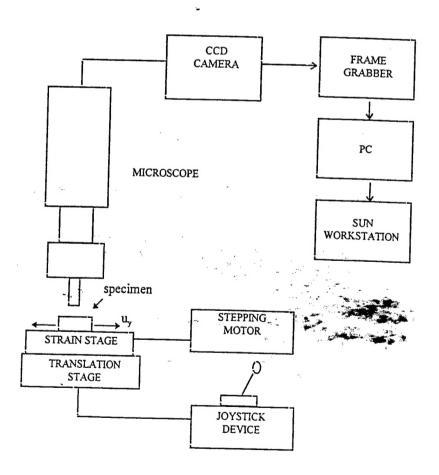

Air Force Research Laboratory Edwards AFB CA 93524-7680

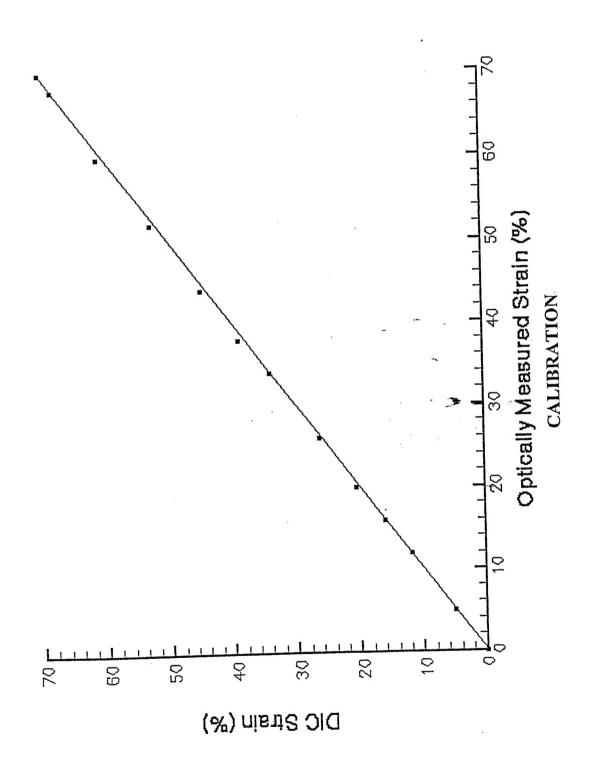

20021119 128

Objectives

- Investigate the Effect of Microstructure on the Strain Distribution near the Crack Tip.
- Determine the Local Strain
 Concentration Factor and
 Strain Rate near the Crack Tip.

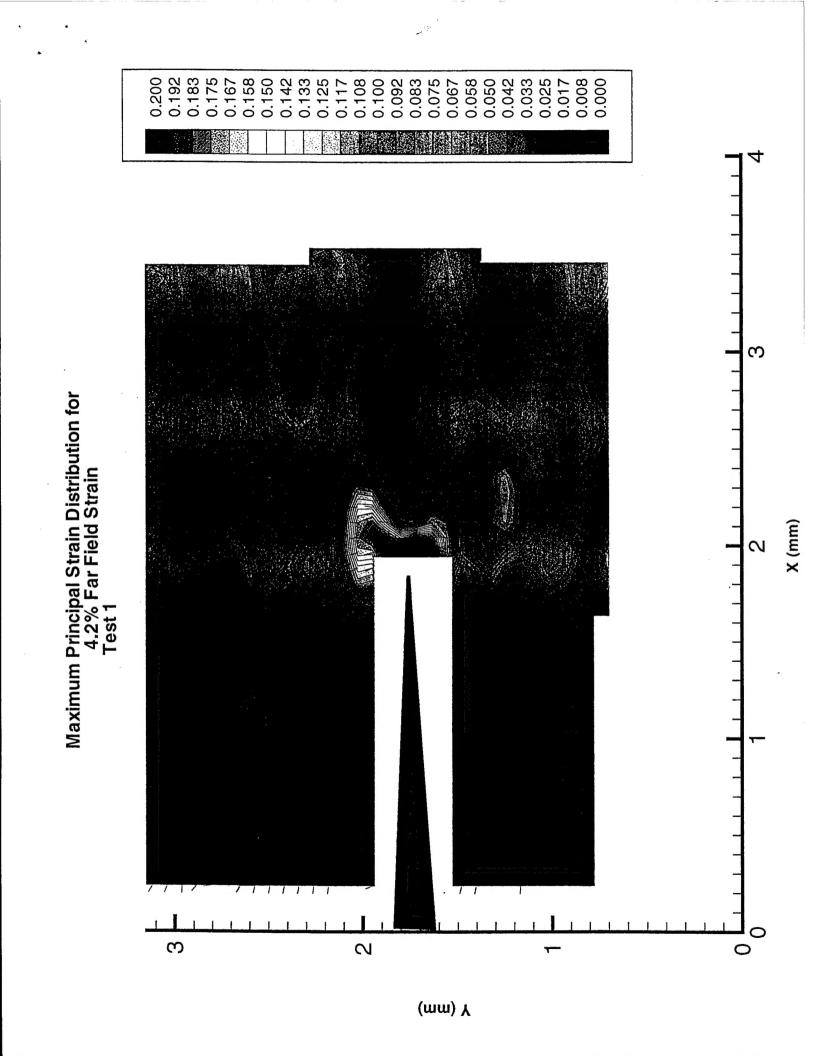

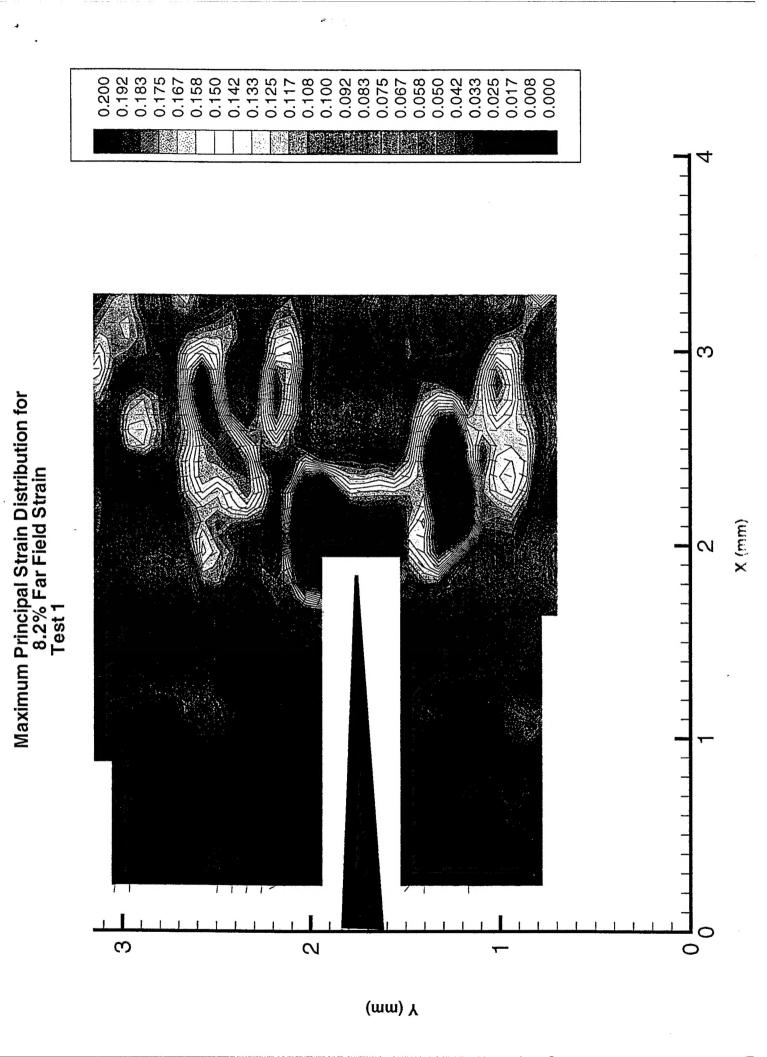

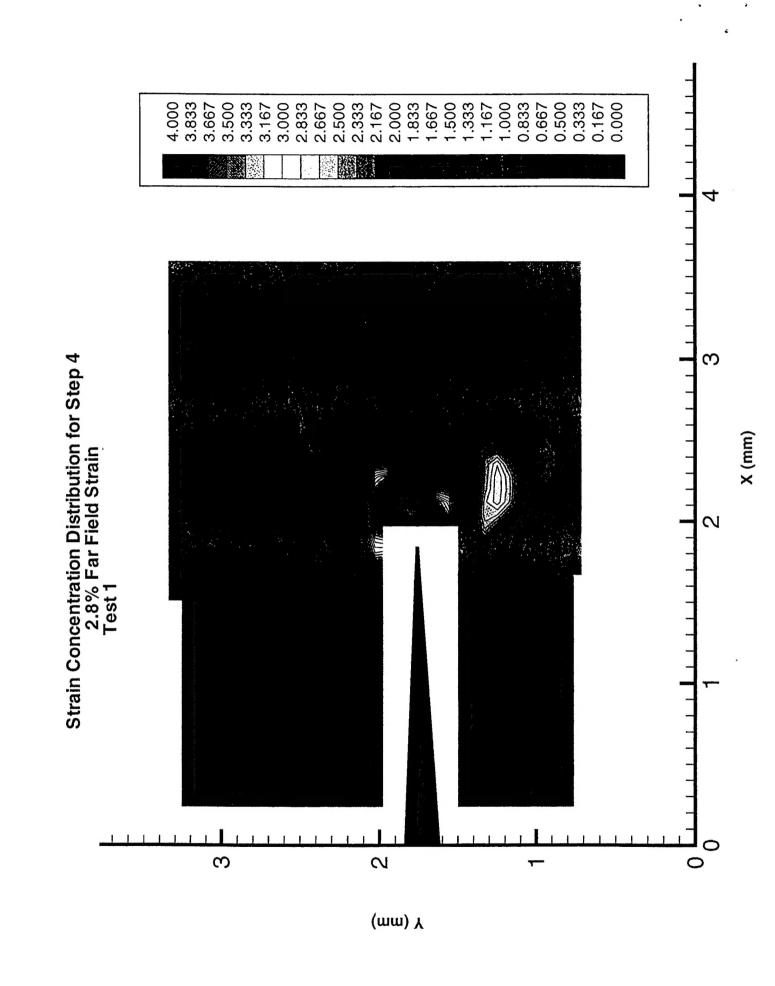

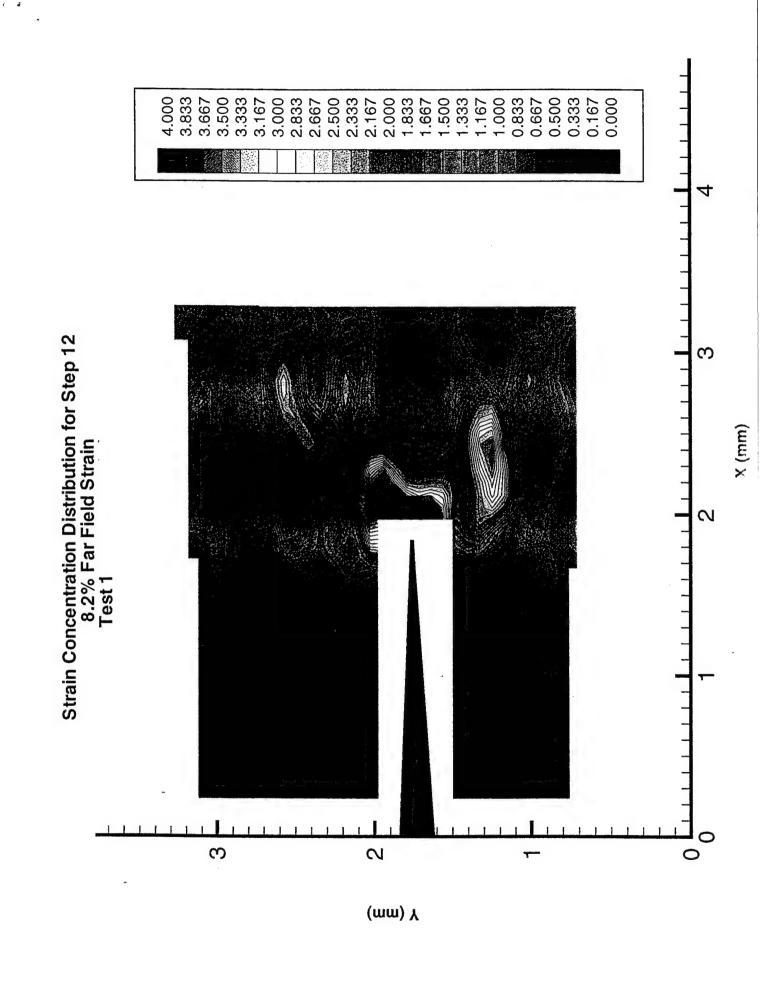

0.200 0.192 0.183 0.175 0.158 0.133 0.092 0.083 0.075 0.058 0.025 0.008 0.142 0.108 0.100 0.050 0.042 0.033 0.167 0.117 0.067 4 ന Maximum Principal Strain Distribution for 2.8% Far Field Strain Test 1 X (mm) S က N 0

Conclusions

- 1. The Digital Image Correlation Technique can be used to Determine Strain Fields where Inhomogeneous Deformations are presented.
- 2. The High Strain Field is Localized within 1 mm of the Crack Tip.
- 3. The Microstructure of the Material has a Significant Effect on the Strain Fields near the crack tip.
- 4. The Crack Growth Mechanism Consists of Void Generation and Coalescence with the Main Crack Tip.
